CAREER SUMMARY

Passionate and seasoned developer with around 10 years of experience in enterprise application development across automotive, telecom, retail and supply-chain domains. Specialised in React, Redux, TypeScript and Node.js with Apollo GraphQL, UI/UX, Tailwind & SCSS, and UI unit/automation testing (Jest, RTL, Cypress, Playwright). Skilled in AI system design with Agentic AI (LangGraph, Gemini), MCP servers, Docker and Kubernetes (k8s). Have single-handedly architected an end-to-end next-generation API platform. Strong communicator and problem-solver, experienced in leading and running teams in Agile environments and setting product-grade coding standards.

PRIMARY SKILLS

Technical Skills: System Design, Microservices, REST / GraphQL Subscriptions, Kubernetes, Cloud Simulations, AI Innovation

Frameworks: React.js, Redux, TypeScript, Node.js, Apollo GraphQL, AI Agent (LangGraph), MCP Servers

Backend: Node.js with TypeScript, GraphQL, Express

Styling: Tailwind, SCSS, CSS3, modern Flex & relative styling

Testing: Jest, React Testing Library, WebdriverIO, Cypress Automation

Deployment: Nginx, Azure DevOps (Docker), Kubernetes (Minikube), GCP GKE

AI / Agentic: Agentic AI (Gemini, LangGraph), MCP (tool & Docker based), RAG, Local LLM POC

Database: MongoDB, Basic SQL

Version Control: Git

Performance: React application performance enhancement and code management

Agile Tools: Sprint Retro Boards, PlanITpoker, Scrum Dashboards

SECONDARY SKILLS

Frameworks: C# .NET, .NET MVC, .NET Core, PHP, Android, jQuery, Angular

Databases: SQL Server, MySQL, MongoDB, Cosmos DB, Oracle

Cloud: Azure Logic Apps, Azure SQL, Data Factory, Azure Functions, VM, Cosmos DB, Firebase, Google Cloud Storage & Functions

Servers: Nginx, Apache, IIS, Apache Tomcat

Languages: C#, Java, PHP, Python

EXPERIENCE SNAPSHOT

Renault Nissan Technology Business Centre India: 1 Year 8 Months (Current)

ACL Digital: 2 Years 3 Months

Xebia IT Architects Pvt Ltd: 4 Years 3 Months

Information Quotient Software Services Pvt Ltd: 1 Year 1 Month

UCertify.com: 8 Months

PROJECT EXPERIENCE

Renault Nissan Technology Business Centre India (OEM – FTE) — *Technical Lead / Architect* — *Automobile Industry*
Dec 2024 – Present

Project 1 — Caiman (Vehicle Telemetry Off-board Platform):

Tools: React.js, Apollo GraphQL, Node.js, MongoDB, TypeScript, Python, API Unit Testing.

- Delivered features including Campaign, Rollout, Business Service, Application Admin, Simulation, Metrics Configuration and multilevel SSOT signal catalog of vehicles.
- Built catalog migration tooling, a Gavial Python microservice and React Flow telemetry graphs.
- Full-stack React + Node.js + Apollo GraphQL + MongoDB with Tailwind styling and RTL/Jest UI unit testing; GCP CI/CD with Docker/Kubernetes.

Project 2 — Renoverse Next-Gen API Platform (sole architect):

Tools: Agentic AI (Gemini, LangGraph), MCP Server, React.js, Apollo GraphQL, Node.js/Express, MongoDB, TypeScript, Kubernetes (k8s), Nginx, GCP.

- Single-handedly architected the end-to-end backend serving 4 production applications across Web and Android Automotive OS (IVI) — no other engineer involved.
- Led AI innovation in the company and built an AI chatbot for IVI (Gemini + LangGraph) with agent streams over GraphQL Subscriptions, plus tool-based and Docker-based MCP servers.
- Implemented dual-mode authentication: JWT for web apps and Mutual TLS (mTLS) for IVI apps.
- Single-handedly developed cloud simulations for the platform; ran POCs for Gemma local model and a RAG pipeline.

Motorola Solutions (via ACL Digital) — Telecom Industry — OnePortal

Sep 2024 – Dec 2024

Tools: React.js, Redux, UI Unit Testing, Node.js, MySQL.

- Built OnePortal to sell TLK Wave devices, tablet and web licenses to partners and customers with direct-customer and reseller dashboards (channels, talk groups, contacts).
- SASS/flex styling, RTL/Jest unit testing and Azure DevOps CI/CD with Docker.

SKF Bearings & Lubrication (via ACL Digital) — Lead Consultant — Bearings Development Industry

Sep 2022 – Sep 2024

Tools: React.js, Redux, UI Unit Testing, Node.js, MySQL.

- Led digitalisation of Mucapat bearings (BAQ, SPB); defined the React/Redux + Node.js architecture and designed a new BAQ bearing from scratch.
- Built EBOM assemblies (inner ring to outer ring / bedacodes), an accounting/time-logging module, and technical spec forms in Aerocost (TypeScript).
- Set up Docker pipeline on Azure, MySQL database, React UI test framework and IIS/Nginx deployment; single point of contact for technical problems.

Tesco Bengaluru (via Xebia) — IT Services — Retail (PLM)

Jan 2020 – Sep 2022

Tools: React.js, Redux, UI Unit Testing, UI Automation.

- Built product lifecycle management app with unique TPNB products — custom week calendar, product creation/edit forms and full customer onboarding dashboard.
- Developed an integrated supplier–customer chat module; Jest RTL unit testing, Cypress/WebdriverIO automation, GraphQL setup and Jenkins CI/CD.

Microsoft / Maersk-Damco (via Xebia) — IT Services — Supply Chain (PRANA & Visibility/MDM)

Jun 2018 – Oct 2019

Tools: React.js, Redux, .NET Core, Azure Logic Apps, Cosmos DB, Azure Data Lake & Data Factory.

- Built container supply-chain management app (React + .NET Core microservices) with Cosmos DB, Azure SQL and Logic Apps for inter-module communication.
- Handled master data management from Azure Data Lake — bulk CSV generation/upload, mediator-pattern Web APIs, Service Bus and Blob/HTTP-trigger Azure Functions.

Information Quotient Software Services Pvt Ltd — IT Product — Invoice Automation / OCR

Jun 2017 – Jul 2018

Tools: React, .NET MVC 4, Google Tesseract (Computer Vision), SQL Server, MySQL, PHP, Apache2, Linux Shell, Python ML.

- Built an invoice-automation product using Google Tesseract OCR to read handwritten invoices with prediction analysis; used across automotive clients like Hyundai.
- Developed end-to-end .NET MVC4 Razor app, cross-server .NET-to-PHP integration, OCR learning algorithm in Python/Shell, and conducted React training & interviews.

UCertify.com — IT Product — E-Learning Simulation Labs

Aug 2016 – Mar 2017

Tools: PHP, React.js, Smarty View Engine, JavaScript, jQuery, CSS3, HTML5.

- Developed complete web simulators of MS Office and Windows OS for US schools, compatible with Windows and iPad.

EDUCATION

B.Tech / B.E., Computer Science Engineering — RGPV University | Year of Passing: 2016

STRENGTHS

Good communication skills, strong problem-solver, and proven ability to lead and work within Agile team environments.
